

# Josue Rodriguez

## Data Scientist, Quantitative Researcher

I pride myself on using my background in research and statistics to tailor principled and creative data solutions to unique business problems. I excel in collaborating with stakeholders across different levels and functions of an organization to improve and better understand exciting and meaningful products. In my off time my hobbies include: exercising, cooking, playing chess, spending time with loved ones, and writing R packages.

## WORK EXPERIENCE

### Quantitative Researcher University of California, Davis

09/2019 - Present

Davis, CA

#### Responsibilities

- Led all aspects of 4+ large-scale projects focused on developing complex statistical models and Bayesian methods and developed the core analytics for 9+ projects
- Engaged in professional collaborations across the US and internationally, resulting in 5 academic publications
- Authored 6 R packages on CRAN
- Taught > 60 graduate students about statistics, machine learning, and data science programming
- Awarded Outstanding Graduate Student Teacher

### Data Science Intern, Data and AI IBM

06/2022 - 09/2022

San Francisco, CA

#### Responsibilities

- Helped develop the AI Fairness 360 R package and created a vignette demonstrating its functionality
- Worked on a cross-functional team of product managers and strategy consultants where I developed an analytics pipeline for one of IBM's Data and AI products
- Contributed to product strategy by delivering actionable insights using Bayesian statistics and predictive models
- Developed a questionnaire and an unstructured interview format to obtain data regarding product experience

### Data Science Intern Spacee, Inc.

09/2021 - 12/2021

Dallas, TX

Spacee leverages computer vision to empower orgs with near-real-time actionable insights for managing inventory and interactive consumer behavior.

#### Responsibilities

- Developed an unsupervised machine learning model to help bring functionality to a remote sensing application
- Conducted exploratory data analysis around key company products and metrics
- Conducted field research concerning the company's operational envelope
- Implemented Python code into a core Airflow pipeline that addressed a deficit in the ETL process

## SKILLS

R Python SQL Statistics Machine Learning

Git Data Visualization Writing Communication

Surveys Experimental Design Research

Storytelling

## CERTIFICATES

Data Scientist with Python (05/2019)

DataCamp

Data Scientist with R (05/2018)

DataCamp

## LANGUAGES

English

Native or Bilingual Proficiency

Spanish

Full Professional Proficiency

French

Limited Working Proficiency

## EDUCATION

### Quantitative Psychology, PhD University of California, Davis

09/2019 - Present

Davis, CA

### Experimental Psychology, MA Cal Poly Humboldt

08/2017 - 05/2019

Arcata, CA

#### Courses

- Minor in Statistics
